

Project Spotlights: Century City Mall

OWNER

Westfield Group LLC

LOCATION

Los Angeles, CA

CATEGORY

Fireproofing

ABOUT THE PROJECT

Cell-Crete Fireproofing not only does the job well—we can make it look good too. In addition to being functional, if the client doesn't want it to look like fireproofing, the material can be shaped to look like a concrete beam. This gives a more uniform look to parking structures, and fireproofing can also be added to columns and beams in outside locations where clients want their building to look cleaner.
