

Project Spotlights: E-320

CLIENT

The Central Puget Sound Regional Transit Authority (Sound Transit)

LOCATION

Bellevue, WA

CATEGORY

Flowable Fills

ABOUT THE PROJECT

Cell-Crete has been contracted for the Sound Transit E-320 project in Bellevue, Washington. This project is part of an East Link Extension that will eventually connect a link light rail line from downtown Seattle to downtown Bellevue. Cellular concrete was specified in an area with soft-soil conditions and to reduce the lateral pressure on the 112th Ave. overcrossing. The project is being done in 3'-4' lifts at approximately 600-800 CY (cubic units) filled per day with the total yardage of around 8,500 CY.
