Slope Stabilization

Project Spotlights: Mount Hamilton Road: Emergency Road Repair

ABOUT THE PROJECT

A mudslide completely washed out a section of Mount Hamilton Road in the hills above San Jose, CA, restricting travel to the Lick Observatory in the South Bay.

THE SOLUTION

Cell-Crete filled against the sheet pile with 31 PCF (pounds per cubic foot) (Class III) cast-density lightweight cellular concrete (LWCC) material and was able to restore Mount Hamilton Road.
